

Living with type 1 diabetes?

Consider the GAZELLE study

If you are an adult between ages 18 and 65 living with type 1 diabetes, you may be eligible to take part in the GAZELLE clinical research trial. This trial will look at an investigational fast-acting insulin to see if it works as effectively as an existing fast-acting insulin already being used to treat diabetes. Trial-related medications, procedures, equipment and supplies will be provided at no cost; health insurance is not required to participate. If you are interested in learning more about this clinical trial, please contact us at:
